

Posters

| Nom | Títol |
|----------------------------|--|
| Chorfi, Ilyes | Stochastic Incremental Approach For Modeling The Claims Reserves - no acceptat |
| Derradjia, Ishak | Fixed point techniques and stability in totally nonlinear neutral differential equations with variable delay |
| Ghilli, Daria | Large déviations for some fast stochastic volatility models by viscosity methods |
| Haus, Emmanuele | Growth of Sobolev norms for the NLS on the torus |
| Kowalczyk, Marta | Bifurcations of critical orbits of gradient equivariant equations |
| Kuna, Mariel Paula | Existence, uniqueness and multiplicity of solutions for a superlinear second order equation |
| Larrosa, Juliana | Fold-Fold Bifurcation for a Certain Piecewise Smooth System |
| Mesbahi, Lazhar | Stability of some first orded degenerate systems in Hilbert spaces |
| Montaru, Alexandre | A gradient flow structure on a Keller-Segel system with critical mass in any space dimension |
| Shahinian, Smbat | About Stability of Dynamical Systems with Integrally small perturbations. |
| Spedaletti, Juan Francisco | Best Sobolev Constant in Oscillating Domains |
| Stan, Diana | Porous medium equations with fractional pressure |
